

Edwin Genova

Software developer looking for new opportunities

EXPERIENCE

Untitled Staking Pool, Philadelphia, PA — Full Stack Developer

Current Project

- Design front end in React.
- Create user authentication with Node/Passport.js.
- Create a database to store user accounts.
- Create a database to post/get user input (forum).

Car Amplify, Philadelphia, PA — Backend Developer

- Create a database in order post/get user input.
- Create a database to dynamically populate the dropdown menu.
- Use Node.js to set up the server and connect the database to the website.
- Work on NHTSA API to get data about cars and post to the page.
- Link to deployed site: <https://car-amplify.herokuapp.com/>

Soundtrack That Movie, Philadelphia, PA — Backend Developer

- Use AJAX to perform API calls to YouTube's API to find content based on user input.
- Developed functionality for UI.
- Link: <https://novaaaax.github.io/soundtrack-that-movie/>
